MINING REGULATIONS OF THE YUKON.

Following are the Regulations governing placer mining along the Yukon River and its tributaries, in the Northwest Territories, fixed by a recent Order-in-Council of the Dominion Government :

INTERPRETATION.

" Bar diggings " shall mean any part of a river over which the water extends when the water is in its flooded state, and which is not covered at low water.

Mines on benches shall be known as " bench diggings," and shall for the purpose of defining the size of such claims be excepted from dry diggings.

" Dry diggings " shall mean any mine over which a river never extends.

" Miner " shall mean a male or female over the age of eighteen, but not under that age.

" Claim " shall mean the personal right of property in a placer mine or diggings during the time for which the grant of such mine or diggings is made.

" Legal post " shall mean a stake standing not less than four feet above the ground and squared on four sides for at least one foot from the top. Both sides so squared shall measure at least four inches across the face. It shall also mean any stump or tree cut off or squared or faced to the above height and size.

" Close season " shall mean the period of the year during which placer mining is generally suspended. The period to be fixed by the Gold Commissioner in whose district the claim is situated.

" Locality " shall mean the territory along a river (tributary of the Yukon River) and its affluents.

" Mineral " shall include all minerals whatsoever other than coal.

NATURE AND SIZE OF CLAIMS.

1. " Bar diggings," a strip of land 100 feet wide at high water mark and thence extending into the river to its lowest water level.

2. The sides of a claim for bar digging shall be two parallel lines run as nearly as possible at right angles to the stream, and shall be marked by four legal posts, one at each end of the claim at or about the edge of the water. One of the posts at high water mark shall be legally marked with the name of the miner and the date upon which the claim was staked.

3. Dry diggings shall be 100 feet square and shall have placed at each of its four corners a legal post, upon one of which shall be legally marked the name of the miner and the date upon which the claim was staked.

4. Creek and river claims shall be 500 feet long measured in the direction of the general course of the stream, and shall extend in width from base to base of the hill or bench on each side, but when the hills or benches are less than 100 feet apart, the claim may be 100 feet in depth. The sides of the claim shall be two parallel lines run as nearly as possible at right angles to the stream. The sides shall be marked with legal posts at or about the edge of the water and at the rear boundaries of the claim. One of the legal posts at the stream shall be legibly marked with the name of the miner and the date upon which the claim was staked.

5. Bench claims shall be 100 feet square.

6. In defining the size of claims they shall be measured horizontally irrespective of inequalities on the surface of the ground.

7. If any person or persons shall discover a new mine and such discovery shall be established to the satisfaction of the gold commissioner a claim for bar diggings 750 feet in length may be granted.

A new stratum of auriferous earth or gravel situated in a locality where the claims are abandoned shall for this purpose be deemed a new mine, although the same locality shall have been previously worked at a different level.

8. The forms of application for a grant for placer mining and the grant of the same shall be those contained in forms "H" and "I" in the schedule hereto.

9. A claim shall be recorded with the gold commissioner in whose district it is situated within three days after the location thereof if it is located within ten miles of the commissioner's office. One extra day shall be allowed for making such record for every ten miles or fraction thereof.

10. In the event of the absence of the gold commissioner from his office, entry by a claim may be granted by any person whom he may appoint to perform his duties in his absence.

11. Entry shall not be granted for a claim which has not been staked by the applicant in person in the manner specified in these regulations. An affidavit that the claim was staked out by the applicant shall be embodied in form "H" of the schedule hereto.

12. An entry fee of \$15 shall be charged the first year, and an annual fee of \$100 for each of the following years. This provision shall apply to locations for which entries have already been granted.

13. After the recording of a claim the removal of any post by the holder thereof or by any person acting in his behalf for the purpose of changing the boundaries of his claim shall act as a forfeiture of the claim.

14. The entry of every holder of a grant for placer mining must be renewed and his receipt relinquished and replaced every year, the entry fee being paid each time.

15. No miner shall receive a grant of more than one mining claim in the same locality, but the same miner may hold any number of claims by purchase, and any number of miners may unite to work their claims in common upon such terms as they may arrange, provided such agreement be registered with the gold commissioner and a fee of five dollars be paid for each registration.

16. Any miner or miners may sell, mortgage or dispose of his or their claims, provided such disposal be registered with, and a fee of two dollars paid to the gold commissioner, who shall thereupon give the assignee a certificate in form "J" in the schedule hereto.

17. Every miner shall, during the continuance of his grant, have the exclusive right of entry upon his own claim, for the miner-like working thereof, and the construction of a residence thereon, and shall be entitled exclusively to all the proceeds realized therefrom; but he shall have no surface rights therein; and the gold commissioner may grant to the holders of adjacent claims such right of entry thereon as may be absolutely necessary for the working of their claims, upon such terms as may to him seem reasonable. He may also grant permits to miners to cut timber thereon for their own use, upon payment of the dues prescribed by the regulations in that behalf.

18. Every miner shall be entitled to the use of so much of the water naturally flowing through or past his claim, and not already lawfully appropriated, as shall, in the opinion of the gold commissioner, be necessary for the due working thereof; and shall be entitled to drain his own claim free of charge.

19. A claim shall be deemed to be abandoned and open to occupation and entry by any person when the same shall have remained unworked on working days by the grantee thereof or by some person on his behalf for the space of seventy-two hours, unless sickness or other reasonable cause be shown to the satisfaction of the gold commissioner, or unless the grantee is absent on leave given by the commissioner, and the gold commissioner upon obtaining evidence satisfactory to himself that this provision is not being complied with may cancel the entry given for a claim.

20. If the land upon which a claim has been located is not the property of the crown it will be necessary for the person who applied for entry to furnish proof that he has acquired from the owner of the land the surface rights before entry can be granted.

21. If the occupier of the lands has not received a patent therefor, the purchase money of the surface rights must be paid to the crown, and a patent of the surface rights will issue to the party who acquired the mining rights. The money so collected will either be refunded to the occupier of the land, when he is entitled to a patent therefor, or will be credited to him on account of payment for land.

22. When the party obtaining the mining rights to lands cannot make an arrangement with the owner or his agent or the occupant thereof for the acquisition of his surface rights, it shall be lawful for him to give notice to the owner or his agent or the occupier to appoint an arbitrator to act with another arbitrator named by him, in order to award the amount of compensation to which the owner or occupant shall be entitled. The notice mentioned in this section shall be according to a form to be obtained upon application from the gold commissioner for the district in which the lands in question lie, and shall, when practicable, be personally served on such owner, or his agent if known, or occupant; and after reasonable efforts have been made to effect personal service, without success, then such notice shall be served by leaving it at, or sending by registered letter to, the last place of abode of the owner, agent or occupant. Such notice shall be served upon the owner or agent within a period to be fixed by the gold commissioner before the expiration of the time limited in such notice. If the proprietor refuses or declines to appoint an arbitrator, or when, for any other reason no arbitrator is appointed by the proprietor in the time limited therefor in the notice provided for by this section, the gold commissioner for the district in which the lands in question, lie, shall, on being satisfied by affidavit that such notice has come to the knowledge of such owner, agent or occupant, or that such owner, agent or occupant wilfully evades the service of such notice, or cannot be found, and that reasonable efforts have been made to effect such service, and that the notice was left at the last place of abode of such owner, agent or occupant, appoint an arbitrator on his behalf.

23. (a.) All the arbitrators appointed under the authority of these regulations shall be sworn before a Justice of the Peace to the impartial discharge of the duties assigned to them, and they shall forthwith proceed to estimate the reasonable damages which the owner or occupant of such lands, according to their several interests therein, shall sustain by reason of such prospecting and mining operations.

(b.) In estimating such damages, the arbitrators shall determine the value of the land irrespectively of any enhancement thereof from the existence of minerals therein.

(c.) In case such arbitrators cannot agree, they may select a third arbitrator, and when the two arbitrators cannot agree upon a third arbitrator the Gold Commissioner for the district in which the lands in question lie shall select such third arbitrator.

(d.) The award of any two such arbitrators made in writing shall be final, and shall be filed with the Gold Commissioner for the district in which the lands lie.

In any cases arising for which no provision is made in these regulations, the provisions of the regulations governing the disposal of mineral lands other than coal lands approved by His Excellency the Governor in Council on the 9th of November, 1889, shall apply.

*Form H.—Application for grant for Placer Mining and
Affidavit of Applicant.*

I, (or we), _____ of _____ hereby apply, under the Dominion Mining Regulations, for a grant of a claim for placer mining as defined in the said regulations, in _____ (Here describe locality.)
and I (or we) solemnly swear :

1. That I (or we) have discovered therein a deposit of (here name the metal or mineral.)

2. That I (or we) am (or are) to the best of my (or our) knowledge and belief, the first discoverer (or discoverers) of the said deposit ; or,

3. That the said claim was previously granted to (here name the last grantee), but has remained unworked by the said grantee for not less than _____

4. That I (or we) am (or are) unaware that the land is other than vacant Dominion land.

5. That I (or we) did, on the _____ day of _____ mark out on the ground in accordance in every particular with the provisions of the mining regulations for the Yukon River and its tributaries, the claim for which I (or we) make this application, and that in so doing I (or we) did not encroach on any other claim or mining location previously laid out by any other person.

6. That the said claim contains, as nearly as I (or we) could measure or estimate, an area of _____ square feet, and that the description (and sketch, if any), of this date hereto attached, signed by me (or us) sets (or set) forth in detail, to the best of my (or our) knowledge and ability, its position, form and dimensions.

7. That I (or we) make this application in good faith, to acquire the claim for the sole purpose of mining, to be prosecuted by myself (or us) or by myself and associates, or by my (or our) assigns.

Sworn before me _____ at _____ this _____ day of _____ 18 _____

(Signature.)

Form I.—Grant for Placer Mining.

No. _____

DEPARTMENT OF THE INTERIOR.

Agency, _____ 18 _____

In consideration of the payment of five dollars, being the fee required by the provisions of the Dominion Mining Regulations, clauses four and twenty, by (A. B.) of _____, accompanying his (or their) application No. _____, dated _____ 18 _____, for a mining claim in _____ (here insert description of locality.)

The Minister of the Interior hereby grants to the said _____ (A. B.) for the term of one year from the date hereof, the exclusive right of entry upon the claim _____ (here describe in detail the claim granted) _____ for the

miner-like working thereof and the construction of a residence thereon, and the exclusive right to all the proceeds realized therefrom.

The said (A. B.) shall be entitled to the use of so much of the water naturally flowing through or past his (or their) claim, and not already lawfully appropriated, as shall be necessary for the due working thereof, and to drain his (or their) claim, free of charge.

This grant does not convey to the said (A. B.) any surface rights in the said claim, or any right of ownership in the soil covered by the said claim; and the said grant shall lapse and be forfeited unless the claim is continuously and in good faith worked by the said (A. B.) or his (or their) associates.

The rights hereby granted are those laid down in the aforesaid mining regulations, and no more, and are subject to all the provisions of the said regulations, whether the same are expressed herein or not.

Gold Commissioner.

Form J.—Certificate of the Assignment of a Placer Mining Claim.

No.

DEPARTMENT OF THE INTERIOR,

Agency,

18

This is to certify that (B. C.) of has (or have) filed an assignment in due form dated 18, and accompanied by a registration fee of two dollars, of the grant to (A. B.) of the right to mine in (insert description of claim) for one year from the 18.

This certificate entitles the said (B. C.) to all the rights and privileges of the said (A. B.) in respect of the claim assigned, that is to say, to the exclusive right of entry upon the said claim for the miner-like working thereof and the construction of a residence thereon, and the exclusive right to all the proceeds realized therefrom, for the remaining portion of the year for which the said claim was granted to the said (A. B.), that is to say, until the day of 18.

The said (B. C.) shall be entitled to the use of so much of the water naturally flowing through or past his (or their) claim and not already lawfully appropriated, as shall be necessary for the due working thereof, and to drain the claim free of charge.

This grant does not convey to the said B. C. any surface rights in the said claim, or any right of ownership in the soil covered by the said claim; and the said grant shall lapse and be forfeited unless the claim is continuously, and in good faith, worked by the said (B. C.) or his (or their) associates.

The rights hereby granted are those laid down in the Dominion Mining Regulations, and no more, and are subject to all the provisions of the said regulations, whether the same are expressed herein or not.

Extracts from Mr. Ogilvie's Reports to the Dominion Government.

William Ogilvie, of the Department of the Interior, in his report to the Surveyor-General of Canada, dated November 6th, 1896, says the name Klondak, Klondyke, or Clondyke, as it is variously spelled, is "a mispronunciation of the Indian word or words Thron-dak or Duick, which means plenty of fish, from the fact that it is a famous salmon stream. It is marked Tondack on old maps. It joins the Yukon from the east a few miles above the site of Fort Reliance.

Concerning the discovery of gold on this stream, he says:—"The discovery, I believe, was due to the reports of Indians. A white man named G. W. Carmach, who worked with me in 1887, was the first to take advantage of the rumors and locate a claim on the first branch, which was named by the miners Bonanza Creek. Carmach located here late in August, but had to cut some logs for the mill here to get a few pounds of provisions to enable him to begin work on his claim, the fishing at Klondak having totally failed him. He returned with a few weeks' provisions for himself, his wife and brother-in-law (Indians), and another Indian in the last days of August and immediately set about working his claim. As he was very short of appliances he could only put together a rather defective apparatus to wash the gravel with. The gravel itself he had to carry in a box on his back from 30 to 100 feet. Notwithstanding this the three men working very irregularly washed out \$1,200 in eight days, and Carmach asserts with reason that had he had proper facilities it could have been done in two days, besides having several hundred dollars more gold, which was lost on the tailings through defective apparatus. On the same creek two men rocked out \$75 in about two hours, and it is asserted that two men in the same creek took out \$4,008 in two days with only two lengths of sluice boxes. This last is doubted, but Mr. Leduc assures me he weighed that much gold for them, but is not positive where they got it. They were newcomers and had not done much in the country, so the probabilities are they got it on Bonanza Creek. A branch of Bonanza, named Eldorado, has prospected magnificently, and another branch named Tilly Creek has prospected well; in all there are some four or five branches to Bonanza Creek which have given good prospects. There are about 170 claims staked on the main creek and the branches are good for about as many more, aggregating say 350 claims, which will require over 1,000 men to work properly.

A few miles further up Bear Creek enters Klondak, and it has been prospected and located on. Compared with Bonanza it is small and will not afford more than 20 or 30 claims, it is said.

About 12 miles above the mouth of Gold Bottom Creek joins Klondak, and on it and a branch named Hunker Creek after the discovery very rich ground has been found. One man showed me \$22.75 he took out in a few hours on Hunker Creek with a gold pan prospecting his claim on the surface, taking out a panful here and there as fancy suggested. On Gold Bottom Creek and branches there

will probably be two or three hundred claims. The Indians have reported another creek much farther up, which they call Too Much Gold Creek, on which the gold is so plentiful that as the miners say in joke, "You have to mix gravel with it to sluice it." Up to date nothing definite has been heard from this creek.

From all this we may, I think, infer that we have here a district that will give 1,000 claims of 500 feet in length each. Now, 1,000 such claims will require at least 3,000 men to work them properly, and as wages for working in the mines are from \$8 to \$10 per day, without board, we have every reason to assume that this part of our territory will in a year or two contain 10,000 souls at least, for the news has gone out to the coast and an unprecedented influx is expected next spring. And this is not all, for a large creek called Indian creek joins the Yukon about midway between Klondak and Stewart river, and all along this creek good pay has been found. All that has stood in the way of working it heretofore has been the scarcity of provisions and the difficulty of getting them up there even when here. Indian creek is quite a large stream, and it is probable it will yield 500 or 600 claims. Farther south yet lies the head of several branches of Stewart river, on which some prospecting has been done this summer and good indications found, but the want of provisions prevented development. Now gold has been found in several of the streams adjoining Pelly river, and also along the Hootalinqua. In the line of these finds further south is the Cassiar gold field in British Columbia, so that the presumption is that we have in our territory along the easterly watershed of the Yukon a gold bearing belt of indefinite width and upwards of three hundred miles long, exclusive of the British Columbia part of it. On the easterly side of the Yukon prospecting has been done on a creek a short distance above Selkirk with a fair amount of success, and on a large creek some 30 or 40 miles below Selkirk fair prospects have been found, but as before remarked the difficulty of getting supplies here prevents any extended prospecting.

Dalton informed me he has found good prospects on a small creek nearly midway between the coast range and Selkirk on his route. His man showed me some coarse gold, about a dollar's worth, he found on the head of a branch of the Aetsak river, near the head of Chilcat Inlet, which is of course inside the summit of the coast range and of course in our territory. From this you will gather that we have a very large area all more or less gold bearing and will all yet be worked.

Good quartz has been found in place just across the line on Davis creek (see my map of the 141st sent you), but of what extent is unknown, as it is in the bed of the creek and covered with gravel. Good quartz is also reported on the hills around Bonanza creek, but of this I will be able to speak more fully after my proposed survey. It is pretty certain from information I have got from prospectors, that all or nearly all of the northerly branch of White river is on our side of the line, and copper is found on it, but more abundantly on the southerly branch of which a great deal of it is in our territory also, so it is probable we have that metal too. I have seen here several lumps of native copper brought by the natives from White River, but just from what part is uncertain. I have also seen a specimen of silver ore said to have been picked up in a creek flowing into Bennet Lake, about 14 miles down it on the east side.

Before closing I may say that every report that comes in from Bonanza Creek is more encouraging than the last. Prospecting has only begun, and up to the date of mailing, November 22nd, very rich prospects have been found on the few claims prospected on. From one dollar to the pan of dirt up to twelve dollars, are reported and no bed rock found yet. This means from \$1,000 to \$12,000 per day per man sluicing. The excitement is intense, but at this season of the year it is naturally very local.

Writing on December 9th, 1896, Mr. Ogilvie said :

Since my last the prospects on Bonanza Creek and tributaries are increasing in richness and extent, until now it is certain that millions will be taken out of the district in the next few years. On some of the claims prospected the pay dirt is of great extent and very rich. One man told me yesterday that he washed out a single pan of dirt on one of the claims on Bonanza, and found \$14.25 in it. Of course that may be an exceptionally rich pan, but \$5 to \$7 per pan is the average on that claim, it is reported with five feet pay dirt and the width yet undetermined, but is known to be thirty feet ; even at that figure, the result at nine or ten pans to the cubic foot, and five hundred feet long is nearly \$4,000,000 at \$5. One-fourth of this would be enormous.

Another claim has been prospected to such an extent that it is known there is about five feet pay dirt, averaging \$2 per pan, and not less than thirty feet. Enough prospecting has been done to show that there are at least fifteen miles of this extraordinary richness, and the indications are that we will have three or four times that extent, if not all equal to the above at least very rich.

On January 11th, 1897, he wrote :

The reports from the Klondak region are still very encouraging. So much so that all the other creeks around are practically abandoned, especially those on the head of Forty Mile, in American territory and nearly one hundred men have made their way up from Circle City, hauling their sleds themselves many of them. Those who cannot get their claims are buying in on those already located. Men cannot be got to work for love or money, and development is consequently slow ; one and a half dollars per hour is the wages paid the few men who have to work for hire, and work as many hours as you like. Some of the claims are so rich that every night a few pans of dirt suffices to pay the hired help when there is any. As high as \$204 has been reported to a single pan, but this is not generally credited. Claim owners are now very very reticent about what they get, so you can hardly credit anything you hear, but one thing is certain, we have one of the richest mining areas ever found, with a fair prospect that we have not yet discovered its limits.

Miller and Glacier Creeks, on the head of Sixty Mile River, which my survey of the 141st meridian determined to be in Canada, were thought to be very rich, but they are poor both in quality and quantity compared with Klondak. Chicken Creek, at the head of Forty Mile, in Alaska, discovered a year ago, and rated very high, is to-day practically abandoned.

January 21st, 1897.—There are applications in for about 380 acres of land on the flat north of the Klondak, on the east side of the Yukon, while all the extent of land available for use on it is about 200 acres. Joseph Leduc, who applied for 160, has only about 110 available for use in building on, the rest being steep hill-side, and the most of the flat is a moss-covered swamp. He had laid out and disposed of a few lots for building on in it, making his streets only 50 feet wide, and the main streets along the river even less, the builders going often close to the bank for convenience in getting water; but I stopped all that, and have the river front at least 66 feet wide, in most places much more. All streets parallel to the river are 66 feet, and all at right angles to those I have left at 50, as Leduc had them. It seems to me that 50 feet is wide enough in this country, as it is hardly likely there will be much heavy traffic on them. Had I made the streets running from the river 66 feet wide it would have put a good many people much inconvenience. I will send out by the next mail a sketch showing the position of all the applications so far. The American Government has given a contract for four mails this winter to Circle City, at \$1,700 each mail, in and out. The mail carriers will take out letters at \$1 each.

January 22nd, 1897.—A quartz lode showing free gold in paying quantities has been located on one of the creeks, but I cannot yet send particulars. I am confident from the nature of the gold found in the creeks that many more of them, and rich too, will be found.

January 23rd.—I have just heard from a reliable source that the quartz mentioned above is rich, as it tested over \$100 to the ton. The lode appears to run from three to eight feet in thickness, and is about 19 miles from the Yukon River. I will likely be called on to survey it, and will be able to report fully.

Placer prospects continue more and more encouraging and extraordinary; it is beyond doubt that three pans of different claims on Eldorado turned out \$204, \$212 and \$216, but it must be borne in mind that there were only three such pans, though there are many running from \$10 to \$50.

I have just received a petition from the miners to attend to the survey of their claims, they doing all the work and boarding and lodging me. I will begin at it in about ten days, and it will likely take me upwards of two months. I am glad to have the opportunity of doing it, for I think I can considerably, if not altogether, straighten out the tangle there is there.

THE LEADING GROCERS,

VICTORIA, B. C.

Dominion Hotel,

VICTORIA, B. C.

Board and Room, \$1.00 to \$1.25 per Day.

MEALS, 25 CTS.

KLONDYKE PARTIES will find Maps, Mining Regulations, and full information as to the best routes to the **Yukon Gold Fields** at the Dominion Hotel. This popular Hotel has long been headquarters for mining men, and is practically a bureau of information. We have looked after all the prominent parties that went to the Yukon via Victoria this season.

The Northern boats leave the Outer Harbor, $1\frac{1}{2}$ miles from the city. We see that guests make proper connection, and our **large Omnibus** conveys them to and from steamers absolutely free of charge.

The **DOMINION** is the largest and best equipped Hotel in Victoria, and for **\$1.00 and \$1.25 per day**, gives accommodations that in the East would cost \$2.00. **Make up your mind to go to the DOMINION and allow no one to change your purpose.**

STEPHEN JONES, PROPRIETOR.

THE YUKON GOLD FIELDS.

HOW TO GET THERE, AND WHERE TO OUTFIT.

George M. Dawson C.M.G., describes the Canadian Yukon as bounded to the south by the northern limit of the Province of British Columbia (Lat. 60°), to the west by the eastern line of the United States Territory of Alaska; to the east by the Rocky Mountain Ranges and the 136th meridian; and to the north by the Arctic Ocean. The district, as above defined, has a total area of approximately 192,000 square miles, of which, according to the most recent information, 150,768 square miles is included in the watershed of the Yukon. "The superficial extent of the district may perhaps best be realized when it is stated that it is nearly equal to that of France, greater than the United Kingdom by 71,000 miles, ten times the area of the Province of Nova Scotia, and nearly three times that of the New England States."

Whether or not the whole of this vast area is auriferous cannot now be said, but there is reason to hope that in all parts of it paying deposits of gold and silver may be found. Sufficient is already known, although only a very small part of the district has been prospected, to rank the Yukon as among the greatest placer gold fields that have ever been discovered.

Gold was first discovered in the Yukon Basin in 1881, when a party went up the Big Salmon River, a tributary of the Lewis, for a distance of two hundred miles and found gold on all its bars, many of them paying very well. During the next few years some mining was done on the Hootalinqua, which flows out of Teslin Lake and into the Yukon. In 1886 gold was dug out of the Cassiar bar on the Stewart River in considerable quantities. Since then gold has been found on Forty Mile Creek, Sixty Mile Creek, Miller Creek, Glacier Creek, Birch Creek, and last, but by no means least, the creeks tributary to the Klondyke.

Forty Mile Creek is for the most part in Alaska, that is in United States territory; the head waters of Sixty Mile Creek are also in Alaska. Miner, Glacier, and Birch Creeks were once thought to be in Alaska, but are now known to be in Canada, and Stewart River and the wonderfully rich Klondyke are wholly in Canadian territory. The latter flow into the Yukon from the eastward, and the whole of the Lewis, Big Salmon and Hootalinqua Rivers are in Canada.

The Klondyke enters the Yukon near the 64th parallel of North Latitude. As yet no paying deposits of gold have been found in the main river itself, the rich placers, which have excited attention all over the world, being upon its tributaries which enter it from the south.

The Klondyke may be reached from two directions. One is by ocean steamer to St. Michael's Island in Bering Sea, and thence up the Yukon River, the distance up the river being 1,679 miles and navigable for vessels of 400 tons. The other is by crossing over the Coast Range of mountains to the head waters of the Lewis branch of the Yukon and descending by boat. The shortest route from Victoria is that *via* the White Pass and is approximately 1,594 miles. This journey is made up as follows:—

From Victoria to Skagway Bay, near the head of Lynn Canal (ocean steamers).....	1,024 miles.
“ Skagway Bay over the White Pass to Lake Tagish (pack trail).	36 “
“ Lake Tagish to Klondyke, down river.....	534 “
	1,594 miles.

Another available route to the Lewis River is from Dyea or Tya, at the head of Lynn Canal, *via* the Chilcoot Pass. This distance is a slightly longer than that *via* the White Pass.

A third route to the Lewis River is *via* the Stickeen River to Telegraph Creek and thence overland by pack train to Lake Teslin. The distance is approximately as follows:—

From Victoria to Fort Wrangel (ocean steamers)....	801 miles.
“ Fort Wrangel to Telegraph Creek (river steamers).....	148 “
“ Overland travel to Teslin Lake.....	150 “
“ Head of Teslin Lake to Klondyke.	584 “
	1,683 miles.

Still another route is from the head of Taku Inlet, a little south of Juneau, thence overland by the valley of the Taku River to Lake Teslin. The distance to Lake Teslin by this route is approximately the same as *via* the Stickeen route. To Klondyke, might be somewhat shorter, according to the point at which the trail will strike the Lake.

THE WHITE PASS.

The White Pass route starts from Skagway Bay, which is five miles below Dyea, the head of Lynn Canal. The bay is a fine natural harbor with good anchorage for vessels of any size. The largest ocean vessels can steam directly into this bay. From the harbor the trail follows the Skagway River to its head, which is near the summit of the Pass, a distance of 16 miles. The first four miles are in the bed of the river and the ascent is gradual. At four miles the canyon is reached, and here the route becomes more difficult. For seven miles the trail works its way along the mountain side rising steadily for almost the entire distance. This is the only hard part of the route. The next three miles is a gentle rise, and they carry the trail to the summit, an elevation of 2,600 feet above the sea level. The country here broadens out into a valley five miles wide, having a

gentle slope to the east. In the twenty miles between the Summit and Windy Arm on Tagish Lake, the total descent is only 340 feet. From the summit valleys also extend to Lindeman Lake and Taku Arm on Tagish Lake.

As this date, July 20th, the trail has been cut through to the Summit and work is steadily in progress eastward. A trail has been blazed through to Taku Arm on Tagish Lake and can be used for pack animals now. In fact several trains are preparing to start over the trail, and a large consignment of horses has been sent up to be put on the regular transportation business over this route, which is now open for business.

The final location of the trail from the Summit to the Lake has not been decided upon, as the Company making it are seeking for the easiest route, but the country being open and comparatively level, after the Summit has been passed, the lack of a graded trail will not be a serious impediment. A liberal allowance of time would be two days for a pack train from Skagway Bay to Tagish Lake, of which not more than six or eight hours would be needed to reach the Summit from salt water.

This trail has been made by the British Yukon Company, the head office of which is in London, and of which E. E. Billingham, Board of Trade Building, Victoria, B. C., is the agent in British Columbia. The Company has an excellent wharf at Skagway, a hotel in course of construction, a saw mill and store.

The plans of the Company are to act as a general transportation company from Skagway Bay to all points in the British Yukon, and for that purpose to provide pack horses on the trail, and later to construct a railway, a survey for which is in progress, and to put steamers on the Yukon and its tributaries. The route from the Tagish Lake north has not been finally determined upon. For the present boats will go through Tagish Lake and down the Lewis River; but it is possible that the trail and afterwards the railway, will be continued to the Hottelintqua River, which is believed to afford the best and safest navigation of any of the branches of the Yukon.

Skagway Bay and the trail as far as the Summit are in territory over which the United States Government now exercises jurisdiction, but the final ownership of which will depend upon the delimitation of the boundary. Beyond the Summit the trail is all in Canadian territory.

For winter travel the trail is the most available. The average snowfall on the Summit is not more than four feet, and the company expect to be able to keep the route open to the Lake all winter and maintain a freight train of sleighs on the river, so that at any season of the year they can carry goods and passengers from Skagway Bay as far north as Dawson City, at the mouth of the Klondyke.

THE CHILCOOT ROUTE.

The Chilcoot route starts from Dyea or Ty-a, at the extreme northern end of Chilcoot branch of Lynn Canal. There is a trading post here. Dyea is accessible to large ocean going steamers. Like Skagway Bay it is in territory over which the United States at present exercises jurisdiction.

For six miles from Dyea the route lies up a river valley, the stream being navigable for canoes in the summer. The canon is then reached, and here begins a sharp ascent to Sheep Camp. From Sheep Camp the trail extends for eight miles up the rugged sides of the mountain, and is impassable for horses. From the Summit to Lake Linderman, nine miles, there is an easy descent, that is easily traversed when the snow is on the ground, but is very rough in the summer season. The total distance from Dyea to Lake Linderman is twenty-seven miles. The lake is five miles wide, and at its foot a short portage is necessary. Lake Bennet is reached at about a mile and is twenty-four miles long. From this point the route is by water down the Lewis River, being the same as that at present taken from Tagish Lake by the British Yukon Company's route.

THE STICKEEN ROUTE.

The Stickeen route, when opened, will have the advantage of being wholly in British territory, for although the mouth of the river is in United States territory, British subjects have the same right to navigate it as American citizens. Goods and passengers intended for this route would have to be transhipped from ocean going steamers to river steamers at Fort Wrangel or some other point near the mouth of the Stickeen. Of the river itself Dr. Dawson says: "It is navigable for stern-wheel steamers of light draft and good power to Glenora, 126 miles from Rothsay Point at its mouth, and under favorable circumstances to Telegraph Creek, twelve miles further. The current is swift, but there are no rapids properly so-called. Stern-wheel steamers for the navigation of the Stickeen should have good engine power, and should not draw more than four feet of water when loaded. The river usually opens for navigation between April 20th and May 1st. The river generally freezes over before the end of November, although ice runs somewhat earlier. On the low lands there is good grazing for horses and cattle from April 20th to about December 1st."

The distance from the Stickeen at Telegraph Creek to Teslin Lake the source of the Hootalinqua River is about one hundred and fifty miles. The trail now in use is considerably longer than this, but exploratory surveys are in progress, and it is confidently believed that a nearly direct route will be found, over comparatively level country. A company has been incorporated to build a railway over this portion of the route. Traffic going by way of Teslin Lake would reach the main Yukon by way of Hootalinqua River, above referred to.

OTHER ROUTES.

The Taku route has not been opened, or even surveyed. A company has been incorporated to build a railway by it to Teslin Lake. Taku Inlet is an extensive harbor, somewhat open to south-west winds, but would serve very well for the terminus of a route into the interior.

Other overland routes by which the Yukon can be reached are the Chilcat Pass, the trail to which leaves tide water near the beginning of the Chilcoot and White Pass routes. It is a difficult route and is not used; the Dalton trail, which starts from the same point and passes overland, a distance approximately four hundred

miles to the Yukon waters ; and the route via Dease Lake, the Frances and Pelly Rivers. Both the latter are easy lines. Ultimately, if the development of the Yukon warrants, there will be no difficulty in finding an easy and all rail route from the head of some of the inlets in northern British Columbia.

THE GOLD FIELDS ARE IN CANADA.

The great gold fields of the Yukon are in Canada. The earliest discoveries were in Canada, but subsequently the principal deposits opened up were in the United States Territory of Alaska. Hence has grown up the practice of speaking of the Alaskan gold mines. Hence, too, the chief trade of the country has been done with cities of the United States. The fact also that two United States trading corporations, the Alaska Commercial Company and the North American Trading and Transportation Company, have control of the import trade by way of the mouth of the Yukon, has also contributed to keeping the trade of the country in the hands of merchants of the United States. Since recent discoveries have shown that the greatest deposits are in Canada, Victoria merchants have secured a larger share of the trade and are controlling more and more of it from month to month. As soon as a Dominion custom house officer is put upon the overland route the supply of nearly the whole of the trade of the gold mines will be in Victoria and other Canadian cities.

TRANSPORTATION AND OUTFITTING.

Several steamers ply regularly between the Puget Sound ports, Vancouver and Victoria and Dyea and Skagway Bay. The only Canadian line is that of the Canadian Pacific Navigation Company, having its headquarters at Victoria. The company has just completed arrangements to put on its splendid ocean-going steamer *Islander* on the route, and will continue to handle freight and passenger traffic as long each season as it offers. This gives to Canadians a Canadian line to these great Canadian gold-fields.

Take the Canadian Pacific Railway to Victoria *via* Vancouver, and at Victoria take the C. P. N. steamers to Dyea or Skagway Bay.

Efforts are being made in the cities of the United States to create the impression that they are the only places to outfit for the Yukon and the only places where steamship accommodation can be got. This is wrong. Everything that a man needs to take into the Yukon can be bought in Victoria as well as anywhere else, and by timing his journey right the prospector, speculator or trader can go directly to the ocean termini of the Passes by steamers sailing from Victoria.

Every person intending to go into the Yukon should make Victoria his starting point.

Goods of all descriptions, either for the outfit of the individual miner, or for the trader, no matter how large his order may be, can be supplied in Victoria as cheaply as at any other point on the Coast, and as the goods are destined for Canadian territory it is a direct advantage to buy them in a Canadian city and thereby save the duties.

The climate of the Yukon is cold in the winter and very warm in the summer. But though the thermometer registered very low in the winter months, there is very little suffering from cold, and not even any very great personal inconvenience. No hardy man need be deterred from going into the Yukon by reason of the cold. A number of women and small children have spent the winter there without discomfort.

Law and order are strictly enforced in the Canadian Yukon by a detachment of the Northwest Mounted Police.

Except during the months of December, January and February, and perhaps in April, when the snow is melting, there are no serious difficulties in the way of reaching the gold mines. When shelter houses have been erected along the river, and the British Yukon Company propose erecting them, it will be quite possible to maintain regular communication all the year round from Dawson City to Skagway Bay, and from the latter point there is open navigation at all seasons of the year.

The mines of the Klondyke, Stewart River and other Yukon points east of the 141st meridian, or, speaking in a more general way for convenience of description, further up the river than Fort Cudahy are all in Canadian territory. Hence duties must be paid on all foreign goods entering the country, the same as at other places in Canada.

Miners purchasing their outfits in the United States or elsewhere out of Canada, must pay duty either at Victoria before taking the steamer, or at Lake Tagish, after crossing the Pass. Attempts have been made by interested parties in the United States to create the impression that the Canadian authorities either could not or would not collect duties. This has already caused distress among miners who have spent all their money buying their tickets and outfits. Goods on which duty is not paid will be confiscated.

To save expense, delay and risk of troublesome complications, miners should outfit at Victoria, B. C., where prices are as low as anywhere else.

The list showing what constitutes an outfit for an individual may be curtailed in a few respects if a man is very economically inclined. If a party go together it would not of course be necessary to purchase as many sets of tools as there are individuals in the party. On reaching Victoria, the various merchants advertising in this pamphlet may be trusted to advise miners as to what they ought to take. They make a special business of outfitting. The supply of provisions is calculated for one year. (See list among our advertising pages.)

Since this pamphlet was written, new discoveries have been reported from Stewart River. This stream is seventy-four miles further up the Yukon than the Klondyke. It is reached by the same route, and all the observations made herein apply to miners going there.

In the course of another season the transportation problem will be on a very much more satisfactory footing than it now is. Under the treaty of 1825 with Russia, when the boundary between Alaska and British territory was defined, the free navigation in perpetuity of all rivers flowing across Alaska was secured to British subjects. This right so far as the Yukon and the Stickeen rivers are concerned, has been confirmed by treaty with the United States. Canadian steamers will be on the Yukon route next year and will afford a means of getting in heavy freight. For information on this point address the Canadian Pacific Navigation Company, Victoria, B. C. The Yukon route is only open during the summer months. It is not safe to start later than August 5th from British Columbia ports expecting to reach St. Michael's Island and go up the Yukon, and the navigation is not open until June. During the intervening months this route affords a safe, though somewhat long way of reaching the gold fields.

The oldest and most experienced outfitters for prospectors and miners on the Pacific Coast, are in business in Victoria—the men who outfitted for Cariboo, Cassiar and Omineca—and know from actual experience just what you want and how to pack it.

Look in our advertising pages for a complete list of Yukon outfit.

Headquarters ♦ for ♦ Miners' ♦ Supplies.

We are the only house in Victoria that carries a complete line of MINERS' SUPPLIES. We run two large stores all under one management, and carry a large stock of

MACKINAW GOODS, BLANKETS, UNDER-WEAR, GLOVES, RUBBER BOOTS, MINERS' SHOES, Etc., Etc.

Established in 1858, we are able to give full information as to the resources of British Columbia. Maps and Pamphlets can be had from us giving full particulars of the mines and mining laws. References—Any person that has been in the Province for any length of time. We are known all over the Province.
